SUMMARY

React and React Native developer with 2+ years of professional experience building and shipping mobile and web applications. Two React Native apps live on the App Store and Google Play, both built from scratch and both integrated with REST APIs I designed and implemented in Spring Boot. Comfortable across the full stack and used to owning a project from first commit to store submission and deployment.

EXPERIENCE

Freelance Full-Stack / Mobile Developer — Freelance | Mar 2026 - Current

Remote

Gino Aquapark — React Native mobile app (May 2026 - Current)

- Built the Gino Aquapark app from scratch (React Native, Expo, TypeScript) and published it on both the App Store and Google Play.
- Implemented interactive Mapbox maps with routing and navigation to guide users around the aquapark territory.
- Built the Spring Boot backend and REST API the app runs on, and deployed the infrastructure on AWS (EC2, RDS).
- Owned the whole project end-to-end for the client — mobile app, backend, infrastructure and store submission.
- App Store: apps.apple.com/ge/app/gino-aquapark/id6787413595
- Google Play: play.google.com/store/apps/details?id=ge.ginoaquapark.app

supta.ge — React Native e-commerce app (Jun 2026 - Current)

- Built the supta.ge mobile app (React Native, Expo, TypeScript, NativeWind, Zustand) — a full e-commerce experience with product browsing, cart/checkout, payments, order tracking and B2B ordering.
- Integrated the app with the existing supta.ge website/backend over its REST API.
- Built the full front-end across many screens, handled EAS builds and published the app to the stores.
- App Store: apps.apple.com/ge/app/supta-ge/id6771674512
- Google Play: play.google.com/store/apps/details?id=ge.supta.ge

Nabiji — Business & Digital Marketing Platform (Mar 2026 - Jun 2026)

- Full-stack project, built from the ground up.
- Built a public-facing web app (React 19, TypeScript, Vite, Tailwind CSS, React Router) with student/business signup, project matching, training, profiles and dashboards; deployed on Vercel.
- Built a separate internal admin dashboard (React, TypeScript, TanStack Query) for managing businesses, students, connections and inbound contact messages.
- Designed and implemented the REST API backend (Spring Boot 4, Java 17) with JWT authentication, Spring Security, JPA/SQL Server persistence, Caffeine caching and AWS S3 file storage.
- Architected the system as three independently deployed services (public frontend, admin panel, backend API) sharing one REST API contract.

Front End Developer — re:soft | Jan 2024 - May 2026

Tbilisi, Georgia

- Led the development of many role-based features for the Alliance platform (alliance.ge/ally.ge), implementing distinct UI/UX variations for Broker, Service User and Supervisor roles to ensure proper access control and functionality segregation.
- Developed the Feeldb application (feeldb.com) from initial concept to deployment using Next.js, encompassing the complete front-end architecture and state management.
- Built the pet-store front-end project from day one, owning the landing page and core front-end implementation end-to-end.
- Contributed to gethome.ge, building out additional pages and fixing bugs to improve site stability and user experience.
- Optimized application performance and improved SEO by implementing best practices, resulting in increased page indexing and organic search visibility for many projects at re:soft.
- Mentored an intern, conducting daily checkups, reviewing PRs and giving feedback.

PERSONAL PROJECTS

Untold Things — racvergitxari.ge | Nov 2024 - Current

Front End Developer, DevOps

- Developed a full-stack social messaging platform using React.js (frontend) and Spring Boot, featuring an original, high-engagement UI/UX design.

- Deployed the application on AWS (EC2, LB, RDS, WAF), establishing a highly-available, secure and scalable infrastructure to efficiently handle user traffic and data storage.
- Drove substantial user growth, achieving 34,000+ active users and 41,000+ total posts by continuously optimizing performance and core features.

TECHNICAL SKILLS

Mobile: React Native, Expo, EAS Build, NativeWind, Mapbox

Front End: React.js, Next.js, TypeScript, JavaScript, HTML/CSS, Tailwind CSS, Zustand, TanStack Query, React Router, Vite

Back End: Java SE, Spring Boot, Spring MVC, Spring Security, JWT, JPA, REST APIs, Node.js, SQL Server, PostgreSQL

Cloud & Tools: AWS (EC2, RDS, S3, LB, WAF), Vercel, Git, App Store / Google Play submission

Languages: Georgian (native), English

EDUCATION

Agricultural University of Georgia — MSc, Food Technology, 2023

Tbilisi State Medical University — Public Health and Management, 2019

TRAINING & CERTIFICATIONS

Oracle Certified Professional, Java SE 8 Programmer I — Oracle | Mar 2025

- Achieved a high score of 94/100.

Java Web Development training — EPAM Systems | Feb 2025 - Jun 2025

- Built skills in the Spring framework, modern architectural patterns, development tools and advanced database systems with Java.
- Successfully finished the course with one of the highest grades in class.

React Accelerator — TBC IT Academy x USAID | Mar 2024 - Jun 2024

- Selected among 30 out of 1500 applicants through a 5-step interview process to receive a scholarship.
- Learned comprehensive React skills including JSX, hooks, router, state management, etc.
- Gained proficiency in the Next.js & Vercel ecosystem (Postgres DB, blob, deployment management).
- As a final project, independently worked on a Superman-themed online toy store, which was selected as a top project: tbc-x-usaid-project-app.vercel.app

Full-Stack Web Development Bootcamp — re:educate | May 2023 - Jan 2024

- Learned foundational web development skills including HTML, CSS, JavaScript, TypeScript, React and Node.js.
